

FG Supplemental - Stolen Plates Problem Statement

Problem Statement - Stolen Plates You are on routine patrol at 2140 hours on a Monday night, when you observe a white Ford Focus occupied by two subjects driving eastbound on a 2-lane downtown roadway lined with stores, restaurants, taverns, and hotels. You notice the plate looks suspiciously bent like it might have been forcefully removed and replaced on the vehicle. Dispatch confirms that the plate is stolen - and that it partially matched the plate seen on a vehicle fleeing at a crash and grab theft which occurred an hour ago in a neighboring jurisdiction. One witness has stated that as the vehicle fled, he saw a handgun waved from the vehicle. That vehicle was further described as a smaller white 2-door.
